So first the Agent in Matrix (Agent Smith) is somehow to young and to make the Agents feel superior such institutions have specific design, so possibly one would find out quite fast if a company is payed by the NSA/CIA just by looking at the design of the building and the design of its rooms...

not yet 100% sure about that...

JOKER CARD

If you are younger than 40 feel FREE TO SAY AS MANY WRONG THINGS as you Like. It's not up to you, to teach or to fix people that are older than you how they could have done things better, but do it better yourself and give this card also to the younger generations and don't make the younger generations clean up your mess like the 1950s generation did to us: https://de.wikipedia.org/wiki/Sonderm%C3%BCndeponie_K%C3%8611iken

Use Cases

If an older Person gives you a bad feeling, if you said something wrong, it's not worth it to invest your time into his "lessons". often the **teacher** (**Sophist** opposite of a **philosopher**) just compensates his own self-esteem at the expense of his students...

Crypto Beginners-Toolkit

Crypto Beginners Toolkit

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good exercise, then continue maybe with Vigenere cipher, and then p-boxes and s-boxes.

Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you don't join the crypto-anarchy movement.

Work in pairs of at least 2 people, if they want to put you in mental institution to erase your brain you have better chances to prevent that.

I don't have a lot of time *INSERT: since they target me permanently* -> psychological warfare but if you have time it's quit easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-red13 you have again the original...

Possibly this unnice guy is on cocaine and thinks he installs psychological malware to the kids at that party. In fact he is just the scapegoat but does it intentionally. Remote Controlled by ti card. If you find this video you will find out what I mean, listen to what he says.

All the things I wrote to that noted here seems to be deleted: <http://marclandolt.ch/doc/mastersOfHardcore.html>

important thing would be that possibly all the young people from this party was owned mit hardware-, software- and psychological backdoors.

if true we need a rescue mission.
