

## EZAK IMAX Hun in the Sun

	Bomber	
	Nach oben	Nach unten
Jäger	Hun-In-the-Sun	0,95
	Ezak-Imax	1
		0

Dieses Spiel besitzt offensichtlich keinen Sattelpunkt (warum?). Welcher Jäger noch Bomber haben keine Strategien, die sich nicht durch den Gegner zu dessen Vorteil auszuwirken lassen, wenn dieser die Strategie im Voraus erfährt. Beide Parteien

Ezak Imax (Kami Kaze in reverse) VS Hun in the Sun. The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok <https://www.springer.com/us/book/9783764353384>

Same Algorithm can also be used in Psychology, Politics ..., for example 95% Slaves in Companies and 5% small hitlers

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psychology design pattern) some assholes use to forced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Julian Assange talked about at HITB SecConf 2009 Malaysia...

## Suicide Death BOT

a16

**Inventor: xxxx** Year: ~????

If a person can be controlled or at least influenced by some technology cards \*\* evil people unfortunately could create some sort of a suicide death bot, using things like m38 Card for priming to make innocent people to commit suicide (attempts). We think that this is the major way eg. CIA kills people that know too much and the reason news are normally not telling the story from people that committed suicide (maybe they killed Ian Murdoch with a suicide death bot). People with lower rank would be told that it's just training or BDSM. But in fact if the Whistleblower would die the whole group would be lost too and so controllable by eg. the CIA, worst case m37 & d1 Card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such suicide death bots would be packed into proprietary non-deterministic crypto both personalized or generic, eg. m38 would be generic. Was Jan Murdoch@Debian also a victim?

## Access Based Enumeration

a15

**Inventor: ???** Year: ~???

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the m50 card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain Access Based Enumeration++ to the society would deescalate this problem a bit. So update your people with this knowledge. I learned about Access Based Enumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.

## SYSTEM-THEORIE

a12

**Inventor: Niklas Luhmann** Year: ~1914

A System is made out of Elements [E] or several Subsystems (= abstracted an Element too). The Elements have relations (Relations [R]) and the relations have (German: Konditionierende [K]) that describes how the Relations have to be. The Law or the Bible or the Koran(?) or Karl Marx "Das Kapital" could be such a "Konditionierende". This helps to understand the big picture, Social-, Mechanical-, Biological-, Computer- Systems or Software. For example if you have Quantuminserts, Tarnoil turbine you could also filter or inject words that would make the victim look or drive insane. ## ARTIFICIAL INTELLIGENCE

a11

**Inventor: Isaac Asimov?** Year: ~1960  
Artificial Intelligence, but also Propositional calculus or (German) Prädikatenlogik (= eg PROLOG) or learning algorithms, the so called singularity is maybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many years ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with mini-max-algorithm and Tic-tac-toe. Control your touring complete Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...
